

10 FINTECH SOLUTIONS FOR A HEALTHY FINANCIAL PROCESS

The Logistics & Fintech programme of Dinalog and Holland Fintech and partners presents 10 fintech solutions for a healthy financial process for the logistics sector.

The entire process of order processing, billing and payments is not always running smoothly and efficiently. Logistics service providers can enhance their financial result by improving this process. The Logistics & Fintech programme has created an overview of common challenges that can be overcome by the use of a fintech solution, which create opportunities that lead to a healthy financial process. The top 10 challenges are created with the use of the research of 'Hogeschool Windesheim' and interviews with logistics service providers in collaboration with 'Transport en Logistiek Nederland' (TLN).

Do you want to know which challenges of your firm can be overcome with fintech solutions? Or is your challenge not represented

in this list? Please contact Gijs Pel, gijs@hollandfintech.com.

Dinalog and Holland FinTech work on innovation in the ambitious logistics & fintech program. In this programme we focus on exchanging knowledge, promoting interest in the theme and creating collaboration opportunities between fintech and the entire logistics chain. The fintech ecosystem is intensively involved, made possible by the Ministry of Economic Affairs. The program aims at creating sustainable, collective solutions that contribute to the continuous development and application of fintech in logistics.
